

The SwingView™ Classic, our mechanical built door, was developed in response to fabricator and customer requests for a more conventional looking door. With wider kick and head rails plus 90° joints, the new SwingView™ Classic replicates the proportions of a more traditionally styled entry door.

Typical SwingView™ Configurations

Typical SwingView™ entry door combinations. Availability is not limited to the samples shown here, consult your dealer for size and configuration availability.

SwingView™
Entry Door

The SwingView™ entry door from VEKA...a classic that will enhance any home.

The SwingView™ all welded entry door is fabricated from reinforced vinyl lineals that are fusion welded to create a door panel that will not rack and is air and water tight. Because the color of solid vinyl is throughout the material, any surface scratches will barely be noticeable.

SwingView™ entry door standard features

1. The SwingView™ all welded frame and door panel is comprised of 5" stiles, head and kick rail.
2. The SwingView™ Classic all welded frame and mechanical door panel is comprised of 5" stiles, 6" head and 9" kick rail.
3. 3 point key operated locking system with deadbolt.
4. 4-9/16" frame depth.
5. Center shootbolts on two-panel french door.
6. Aluminum reinforced frame, sash astragal and mullis for rigidity.
7. Brass or white hardware finish.
8. 4"-three way, adjustable hinges.
9. Anodized, corrosion resistant aluminum sill cover with integral rolling track for optional screen.
10. Internal weep system.
11. Vinyl wall thickness of .100".
12. Dual seal weather-stripping.
13. PVC brick mold finishing accessory.
14. Drip cap/hood for water diversion over sill.
15. Colors: white and beige vinyl.
16. Door available with integral transoms and flankers.
17. 1" glazing.
18. Moveable mullion for french swing door application.
19. Glazing aesthetics as per distributor package.
20. Sliding or hinged screens available as per distributor.
21. AAMA approved PVC lineal certification.
22. NFRC simulations.
23. Energy Star® Partner.

SwingView™ Classic

All SwingView™ doors supplied and built by VEKA ship with corrosion resistant key operated brass hardware, multi-point locking mechanism and 3-way adjustable hinges. Complete installation instructions are supplied to ensure a secure and proper field alignment of the finished entry door.

The beauty of maintenance free service

Every SwingView™ Entry Door is fabricated from the highest quality PVC available. Our compound was formulated in Europe over 35 years ago and is one of the most widely utilized and tested materials for window and door fabrication today. PVC's through-and-through color and low thermal conductivity make it the ideal material for door and window construction. The hollow chambered UV resistant lineals, which act as dead air insulators, are reinforced with .094 gage aluminum for added strength and rigidity.

High performance and low maintenance are not the only reasons to consider the SwingView™ Entry Door from VEKA. These doors are a stylish and versatile addition to any home. You may select from white or beige vinyl and combine cherry, dark oak or our stainable light oak interior finish. Custom grids and art glass are available at the discretion of the distributor. Combine transoms and flankers to create a wall of light that will provide an open and airy feel along with a warm and welcoming glow.

Every SwingView door is assembled using quality components

Optional brass hardware Key operated lock with deadbolt PVC brick mold 3-way adjustable hinge True french center shoot bolt

The SwingView™ line of entry doors from VEKA are elegantly designed and solidly built from high quality, maintenance free reinforced vinyl lineals to create a door that will not rot, warp, chip, peel or corrode. Vinyl lineals are warm to the touch and form an excellent thermal break between you and the elements.

As with all SwingView™ products these doors may be ordered as an in-swing or out-swing configuration in the standard sizes noted below. SwingView™ doors can be ordered in either white or beige colored vinyl. Standard vinyl and woodgrain laminate combinations are shown to the right.
